

**New whirlpool Divan complements the assortment of spas for public use, meeting the specific technical requirements of such installations, and all related standards.** It is possible to install the spa also in the exterior, with or w/o the cladding. The whirlpool offers two original interior solutions – two different versions of layout of the jets for hydrotherapy and apart from the conventional overflow channels also the design version with integrated channels. The shell is also possible to use in projects with classical installation into the ground with technology in separate technological room.

**In case of need or wish of the customer it is possible to use a special cladding Kompakt - a unique design system of boxes,** hiding the technology and with the stair parts perform other necessary feature for ease of use in case of above-ground installation.

## STANDARD EQUIPMENT
